

PL PROJECTS

PROJECT
FUNDAMENTALS
QUALIFICATION (PFQ)

WHO IS IT FOR?

HOW IS IT STRUCTURED?

WHAT IS IT?

The Association for Project Management (APM) PFQ course takes a practical look at some of the key theoretical ideas of project management (PM) and explores how these are applied to the modern workplace.

It is an excellent introduction to the core concepts of the profession, offering a fundamental awareness of PM processes, roles and terminology.

The PFQ is suitable for a broad range of professionals from a number of different industries and backgrounds.

Designed for individuals who are relatively new to the world of PM. No prior PM knowledge or experience is required.

This full time, 2.5-day course is intended to prepare participants for the PFQ multi-choice examination on the final day.

The course is presented in a classroom-style delivery via a live video conferencing platform. Our experienced tutors will take you through the course materials online where you will be able to clarify any points as they might occur. Official APM sample questions and mock tests will be included to assist with preparation for the exam.

WHAT DOES IT COVER?

The PFQ training course provides an in-depth coverage of:

- Project Management definitions
- The project life cycle
- Business case and project management plan (PMP)
- Programme management
- Planning and scheduling
- Estimating and budgeting
- Stakeholder management
- Leadership, teamwork and communication
- Negotiation and conflict management
- Risk management
- Change control
- Transition to 'business as usual'

WHAT DO OUR CANDIDATES THINK?

“

The trainers' wealth of knowledge and experience in project management shone through and their communication style kept me engaged throughout. I now feel confident that I can effectively implement project management approaches in a project environment.
